

Q8 Oils

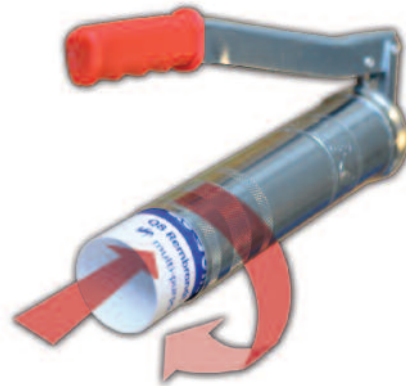

innovative Q8Oils Lube Shuttle[®] grease cartridges

Save time and money thanks to the Q8Oils Lube Shuttle[®]

In a single move:

- twist the screw cap off, screw in the grease cartridge and get started greasing

At a glance:

- you can see both the type of grease as well as the volume

Other advantages:

- 25 % lighter than a standard lubrication pump.
- Work without getting your hands dirty.
- Optimum use of the grease. Save nearly 2 full grease cartridges per box in comparison to a standard cartridge.
- Opens and closes without extra tools.

Q8Oils Lube Shuttle® products

Q8 Rembrandt EP 2

multi-purpose EP 2 grease

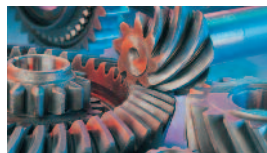

Can be used in:

- excavation and agricultural equipment
- cranes and winches
- heavy goods vehicles
- conveyor belts
- electric engines
- other industrial rolling and plain bearings

Properties:

- excellent rolling properties
- superb anti-wear characteristics
- high level of protection from rust, even when water is present

Specifications

Q8 Rubens WB/b

“Extreme pressure” lithium complex grease

Can be used in:

- rolling and plain bearings working under heavy to extremely heavy loads in:
- wheel bearings, heavy goods vehicles and coaches
- asphalt plants and industrial bitumen processing plants
- paper machines
- metals industry (ferrous and non-ferrous)
- other applications with high thermal and mechanical work loads

Properties:

- long relubrication intervals
- highly pressure resistant
- excellent thermal and mechanical stability
- very good protection from rust and corrosion

Specifications

Q8 Multi LCX 2

multi-purpose water-resistant grease

Can be used in:

- contracting equipment
- maritime industry
- landscape architecture and forestry
- transport sector

Properties:

- excellent cohesive properties
- highly waterproof
- high level of protection from wear due to EP additives
- superb protection from corrosion
