

# Q8 Henry 32

Group II based hydraulic oil approved by Bosch Rexroth

## Description

Q8 Henry 32 is a superior group II based oil with exceptional oil drain intervals and extremely high thermal and oxidation stability. The zinc-based anti-wear hydraulic fluid is developed to meet the requirements of the most rigorous hydraulic specifications and is approved by Bosch Rexroth. Q8 Henry 32 has an exceptional performance under high loads, pressures and temperatures.

## **Applications**

Q8 Henry 32 is used in a wide range of industrial hydraulic applications. It is also applied in systems operating in severe conditions (high pressure, extreme temperatures) that require high performance hydraulic oils such as servo hydraulics. Q8 Henry 32 is recommended in mobile and off-road hydraulic equipment.

#### Benefits

- Increased equipment lifetime thus less downtime of machinery
- No loss of quality over time
- Extremely applicable in difficult and severe conditions
- Zinc included technology
- Long term stable fluid viscosity through excellent shear stability
- Superior oxidation stability
- Exceptional thermal durability
- Exceptional filterability

### **Properties**

	Method	Unit	Typical
ISO Viscosity Grade	-	-	32
Density, 15 °C	D 4052	g/ml	0.86
Kin. Viscosity Base Oil at 40 °C	D 445	mm²/s	31.37
Kin. Viscosity Base Oil at 100 °C	D 445	mm²/s	5.49
Viscosity Index	D 2270	-	111
Flash Point, COC	D 92	°C	209
Pour Point	D 97	°C	-36
Copper Strip, 3 h, 100 °C	D 130	-	1A
Rust Test, Proc. A and B, 24 h	D 665	-	pass
Total Acid Number	D 974	mg KOH/g	0.4
Emulsion, Distilled Water, 54.4 °C	D 1401	-	40-40-0 (10 min)
Air Release, 50 °C	D 3427	min	1.4
Foam, 5 min blowing, seq. 1-2-3	D 892	ml	20/10/20
Foam, 10 min settling, seq. 1-2-3	D 892	ml	0/0/0
Oxidation stability, Time to 2.0 TAN	D 943	hrs	5220
FZG Test, A/8.3/90	DIN 51354	load stage	>10

The figures above are not a specification. They are typical figures obtained within production tolerances.
