

## Q8 Auto H-EV ATF

Synthetic ATF Transmission fluid for Hybrid- and E-vehicles

### Description

Q8 Auto H-EV ATF is a synthetic Hybrid-EV Automatic Transmission Fluid for E-Automatic Transmissions with extended drain intervals. Q8 Auto H-EV ATF delivers Outstanding resistance against wear and extends transmission life and excellent oxidation and thermal stability as well as improved frictional performance and shear stability. Q8 Auto H-EV ATF offers improved fuel economy, and provides immediate lubrication after cold start and protects with outstanding elastomer compatibility

### Applications

Q8 Auto H-EV ATF can be used in E-Vehicles requiring low viscosity ATF lubricants. Q8 Auto H-EV ATF is approved for General Motors Dexron VI GMN10060 and is backward compatible with Dexron III and Dexron IIE applications.

### Benefits

- Extends equipment life
- Optimal friction characteristics even at low temperatures
- Improved shear stability for a stable viscosity during use
- Excellent oxidation and thermal stability
- Full synthetic formulation to provide an extreme thermal stability.

## Properties

	Method	Unit	Typical
Density, 15 °C	D 4052	g/ml	0,845
Kinematic Viscosity, 40 °C	D 445	mm <sup>2</sup> /s	29.0
Kinematic Viscosity, 100 °C	D 445	mm <sup>2</sup> /s	6.0
Viscosity Index	D 2270	-	152
Brookfield Viscosity, -40 °C	D 2983	Pa.s	12
Pour Point	D 97	°C	-54
Flash Point, COC	D 92	°C	>200

The figures above are not a specification. They are typical figures obtained within production tolerances.
