

Q8 Antifreeze Extended Life Premixed

Premixed engine coolant based on OAT technology

Description

Q8 Antifreeze Extended Life Premixed is an engine coolant based on OAT technology (organic additive technology), providing freezing and corrosion protection. In today's combustion engines, the engine and cooling system need to be protected against corrosion and frost damage. Q8 Antifreeze Extended Life provides freezing and boiling protection, and is compatible with commonly used metals and elastomers while providing efficient heat transfer.

Applications

Q8 Antifreeze Extended Life Premixed is an all-round coolant, meeting industry standards such as British Standard BS 6580 and the French standard NF R 15-601.

Benefits

- Outstanding system metal corrosion protection.
- Outstanding compatibility with system rubber seals
- All seasons type engine coolant.
- Outstanding compatibility with car paint and finishes.
- Superb corrosion protection of coolant system metal compositions and solders.

Specifications, recommendations and approvals

AFNOR	NF R 15-601	CUNA	NC 956-18 (Except RA)
AS	2108-2004	France NFR	15-601
ASTM	D 3306	GB	29743-2013
BS	6580	SAE	J 1034
CUNA	NC 956-16	UNE	26-361-88/1

Properties

	Method	Unit	Typical
Density, 15 °C	D 4052	g/ml	1.0690
Colour	Visual	-	Blue-green
Freezing Protection	D 1177	°C	-35
Dry Equilibrium Reflux Boiling Point	FMVSS 116	°C	159

The figures above are not a specification. They are typical figures obtained within production tolerances.

Remarks

This type of engine coolant is recommended to be replaced after 2 years
