

Q8 Brunel XF 700

A new generation of coolants

Outstanding operational performance

Thanks to an innovative formulation, Q8 Brunel XF 700 series coolants are extremely resistant to bacterial infection and ensure a longer service life than conventional fluids, thereby ensuring a significant reduction in costs and waste.

NATURAL GAS-DERIVED BASE

The Q8 Brunel XF 700 series was developed with bases derived synthetically from natural gas. The unique nature of the base, in addition to its extremely high purity, gives it incredible stability properties compared to traditional petroleum-derived base oils.

These bases have a number of strengths: they are free of sulphur, nitrogen and aromatic compounds, they are colourless and odourless and they are characterised by a high viscosity index, excellent oxidation stability, a very high flash point and very low volatility.

This technology represents a further development achieved by our laboratory, which is constantly working on new, cutting-edge formulations to guarantee customers products with increasingly sustainable profiles, without sacrificing ultra-high performance.

Strong health and safety profile

Free of derivatives of boron and any biocide

Excellent corrosion protection

Good wetting and cleaning properties

Improved productivity

Increased tool life

Water soluble core range

	Emulsion	Base type	Refractor factor	5% pH

QCare™

Q8Oils

Next-gen reporting for the industry
Complete reporting without compromise
Intuitive reporting; optimum performance

QCARE FROM Q8OILS

Developed by Q8Oils, the QCare platform brings a bespoke, intelligent, and tailored solution to support Q8Oils customers and machinery when dealing with metalworking fluid operations.

The highly adaptable system allows users to monitor every aspect of operations, giving them a way to increase performance and save on costs.

INTELLIGENT ASSET MANAGEMENT

The system will manage the lubrication and coolant of any given machine so that it remains working optimally for longer. Analytics results from each machine are automatically recorded and displayed for users. By giving you this overview QCare enables you to see the coolant status at any time. With this information you can then see trends in the data and use that information to generate reports instantly.
