

Jenbacher Coolant Mix 5050

Jenbacher high-performance coolant

Description

Jenbacher Coolant Mix 5050 is a ready-to-use engine antifreeze coolant providing a reliable protection against corrosion and cavitation in modern gas engine cooling systems. The product is pre-diluted with demineralized water intended to use without further dilution.

Jenbacher Coolant Mix 5050 provides antifreeze protection down to -37°C and is designed to support reliable cooling system operation across a broad range of ambient and operating conditions.

Applications

Reliable protection against freezing, corrosion, and cavitation in modern gas engine cooling systems.

Features

Engine performance

Benefits

Protects vital engine components from overheating

Engine protection

Excellent engine protection against corrosion, cavitation and freezing

Safety

Nitrite-, phosphate-, amine- and 2-EHA-free product with reliable corrosion protection, excellent material compatibility and compliance with REACH requirements.

Maintenance

Enables leak detection and traceability thanks to a fluorescent color clearly visible when exposed to UV light.

Lower operational costs

Non-depleting corrosion inhibitor technology increase life span of the coolant lowering operational costs.

Properties

	Method	Unit	Typical
Appearance	Visual	-	Bright and clear
Density, 20 °C	D 4052	g/ml	1,073
pH	D 1287	-	8,4
Colour	Visual	-	Fluorescent green

The figures above are not a specification. They are typical figures obtained within production tolerances.

Remarks

Jenbacher Coolant Mix 5050 is ready for use engine coolant, the product should not be diluted with water.
