

Q8 Henry 68

Group II based hydraulic oil approved by Bosch Rexroth

Description

Q8 Henry 68 is a superior group II based oil with exceptional oil drain intervals and extremely high thermal and oxidation stability. The zinc-based anti-wear hydraulic fluid is developed to meet the requirements of the most rigorous hydraulic specifications and is approved by Bosch Rexroth. Q8 Henry 68 has an exceptional performance under high loads, pressures and temperatures.

Applications

Q8 Henry 68 is used in a wide range of industrial hydraulic applications. It is also applied in systems operating in severe conditions (high pressure, extreme temperatures) that require high performance hydraulic oils such as servo hydraulics. Q8 Henry 68 is recommended in mobile and off-road hydraulic equipment.

Benefits

- Improves the durability of the equipment thanks to its characteristics
- Extensive oil drain interval for a longer lubricant lifetime
- Extremely recommended in extremely difficult and rough conditions
- Zinc included technology
- Long term stable fluid viscosity through excellent shear stability
- Excellently resistant to ageing
- Superior thermal stability
- Exceptional filterability
